available instore  
**!NOW!**

Looking for a new machine? I recommend a Pfaff!

Another feature that outperforms all other machines for me is the automatic needle up/down feature which lifts the presser foot automatically without hands or even a knee lever!! For the hours of applique I do, this is just heaven!!!

I can't live without my IDT, Integrated Dual Feed – the original from Pfaff! The dual feed is just so convenient. I don't have to fiddle around trying to put a walking foot on – it's already there! All my quilting, applique and piecing is more precise and I can add decorative braids effortlessly thanks to the assistance of the IDT!

Why Pfaff is Michele Hill's No.1 choice  
Sewing on a Pfaff just makes sense!
